Visitor Identity Management System

Enhance Security & Streamline Visitor Operations

Our enterprise grade Visitor Identity Management System (VIM) is a comprehensive solution for managing visitor check-ins, security protocols, and access control at your organization. Designed to ensure both safety and efficiency, MERON VIM delivers real-time visibility into visitor activity, while simplifying the check-in process for guests, employees, and contractors. By enhancing the visitor experience through streamlined processes and clear communication, businesses can make a positive impression, reduce administrative workload, and maintain a secure, welcoming environment for guests and employees alike.

Why Choose MERON VIM?

- **Scalable Solution** for managing a single site or multiple locations.

- **Customizable Platform** lets you tailor workflows, reports, and security settings.

- **Advanced Security Features** from biometric access to integration with surveillance systems ensures the highest level of protection.

- **Global Support** with 24/7 customer service and global deployment options.

> ❝Visitor identity management isn't just about tracking who's coming and going; it's about safeguarding your organization, your people, your buildings ensuring every guest is accounted for, and maintaining a secure environment.❞
>

Key Features

Secure Visitor Check-In

- **Touchless** pre-registration and check-in via mobile, QR codes, or kiosks.

- **Paper and PACS Visitor ID Badges** automatically generated.

- **Automated Alerts** notify hosts when their visitors arrive.

- **Watchlist Integration** screens visitors against internal and external watchlists.

Comprehensive Data & Reporting

- **Real-Time Dashboards** track visitor flow, visitors on-site, and historical data for compliance audits.

- **Customizable Reports** available for visitor history, visit duration, and security incidents.

- **Data Privacy & Compliance** ensures adherence to GDPR and CCPA regulations with secure storage and anonymization options.

Access Control Integration

- **Seamlessly Integrates** with existing EAC systems, including PACS, keycard and biometric devices.

- **Visitor Access Levels** assigned based on visitor type (contractor, VIP, delivery, etc.).

- **Scheduled Access** for temporary visitors limited to specific areas during pre-set times.

Benefits

- **Improves Security & Control** by maintaining strict access controls and knowing who is on-site

- **Boost Operational Efficiency** with automated visitor management that eliminates manual processes and frees up personnel for other tasks

- **Ensures Compliance** by adhering to health and safety mandates.

Employee & Contractor Management

- **Pre-Registration** for visitors or to schedule regular contractor check-ins.

- **Compliance Tracking** for certification and compliance requirements with expiration reminders.

- **Host Accountability** records host details for all visitors.

Health & Safety Compliance

- **Health Screening** integrates health questionnaires or temperature checks.

- **Evacuation Support** tracks visitor locations with accurate lists of individuals on-site.

- **Contactless Visitor Management** minimizes physical touchpoints, promoting hygiene and safety.

Technical Specifications

- Cloud-based with on-premise options

- Integrates with major access control systems, Epic / Cerner / HL7 datasets, HR management systems, SSO, etc.

- Data Security with 256-bit encryption, GDPR-compliant storage, and role-based access control

- Mobile iOS and Android Apps for on-the-go visitor management

- Multi-Language Support for global use

- **Enhance Visitor Experience** with fast, intuitive check-in processes.

- **Data-Driven Insights** optimize visitor flow, enhance security protocols, and streamline operations.

- **Visitor Mustering** keeps track of visitors during emergencies.

Patient Visitor Management

MERON Patient Visitor Management System streamlines and enhances the user experience in healthcare facilities with pre-registration, online check-ins, health screenings, and managed access to restricted areas. MERON VIM integrates with Electronic Health Records (EHR/EMR) systems and HL7 compliant interfaces, and is compliant with HIPAA, Pre Screenings, PII, DNA and H&S systems.
